OUR ALMA MATER

ACKNOWLEDGMENT

The Editor wishes to take this opportunity to thank those who have helped him make this publication a success.

To Mr. L. Spry for his corrections of all manuscripts and most helpful advice.

To Mr. Alfred Braz and Mr. Ben Ciesla to whom must be attributed the art work for the Year Book.

To Mr. O. F. Parachini and the members of the Year Book Committee for the excellent cooperation in the publication of the Year Book.

To the Fratech Staff, for their hard work in making the Fratech a success. For the last time I present my Staff in the hope that the repetition will remind us all of their worthiness.

Fellow Classmates

It is difficult, when reviewing events of four years, to point definitely to any one as outstanding. The affairs and activities of the class have all been of high calibre and none deserves more mention than another. Successful and memorable events take place only through the efforts of diligent workers. It is, therefore, fitting that we pause at this time to express our appreciation of these men. To my fellow officers for their kindly advice and splendid cooperation. To James Grady, rightfully the father of the class of '37, whose ever-present feeling for the class has made him its most faithful member. Jim, for two years as treasurer of the class and last year as chairman of the Junior Prom Committee, has given invaluable help with his mature advice. The best of luck, Jim, a man who is as hard a worker and as earnest as you deserves success. To Frank Beldowski, class president for the last two years. Frank owes his success to his willingness to work as hard on a task as any man he assigns to that task. His able management of the class in past years has contributed much to its success. To Harry Keller for his excellent direction of class matters. Harry is always around when wanted, always ready to help and always pushing '37 to the fore. To all members of committees and each and every member of the senior class my sincere thanks for your fine cooperation. Yours was a job well done. It was an honor and pleasure to serve you.

We, as a class and as individuals, have traveled a long journey, some four years and some six years. In this trek we have amassed an abundance of engineering principles and stored up in our minds memories which will not be forgotten. Let us hope that our associations have made us many friends and taught us to live more wisely with our fellow man. If this has been accomplished, the organization of the class will not have been in vain. Socially we have been prominent, fraternally we have been successful. We can be justly proud of our achievements.

O. FRANK PARACHINI

Allan R. Cullimore, B.S.

President of the Newark College of Engineering

Beta Theta Pi; Phi Kappa Phi; Bachelor of Science in Civil Engineering, Massachusetts Institute of Technology, 1907; Dean, College of Industrial Science, Toledo University, 1913-1917; Dean, College of Engineering, University of Delaware, 1917-1920; Director of Newark Technical School since 1920; Member American Chemical Society; Society for the Protection of Engineering Education; Society for the Advancement of Science.

To the Class of 1937

All of you who graduate from the Newark Technical School will carry your education further. As long as you live you will learn, and he who lives most successfully learns the most.

Some considerable number of you will come back to us to take more advanced work in your profession and you may wonder just why the requirements for this work are so high and why success in it seems difficult.

You have been given in the time available to us the fundamentals of science and mathematics covered in the first two years of college work, and these furnish an absolutely necessary basis for further specialized professional work.

The granting of a degree by us means that we must meet certain criteria concerning the content of our courses, their length, and the character of the men who give them. This is something externally imposed which we must meet. If we do not, you will not receive proper recognition for your work; you will not be eligible for licensing in various states and territories; and you will find proper entrance into your professional society very difficult.

Entrance requirements for work toward a degree entail therefore responsibilities broader than the institution and of general application throughout the country.

There is, however, our own point of view which you should understand quite thoroughly before taking up more advanced work. The costs in the college are paid partly by yourself and partly by the taxpayers; some of this comes from the City and some from the State. Our responsibilities then extend both to you as an individual student and to the taxpayers as a group. The work which you do here must be satisfactory from both points of view.

You must personally be able to benefit by the work, and in order to benefit by it you must be capable of taking the work and passing it with a satisfactory standing. You have already been with us for four years, and on the basis of this experience we ought to be able to tell whether you can carry the work and whether it would be beneficial to you; and we certainly would not or could not suggest or recommend that you continue unless we knew that you were individually to profit by it.

From the standpoint of the general taxpayer there must be some reason why he as an individual should pay for your education as an individual. That means that you must have ability and capacity for leadership which ability and capacity extend outside your profession and makes you interested and active in the affairs of the general community to which you belong. The public has a perfect right to insist that as they bear a part of the expense they have a right to receive a return and we who administer the work here have the responsibility of indicating to them and to you those of you who in our opinion it pays to educate.

This amounts to saying that education at public expense or partially public expense entails a dual responsibility, and those of you who continue as well as those of you who graduate should realize that there is a definite responsibility on your part as well as a responsibility on our part to the community and to society.

ALLAN R. CULLIMORE
March 16, 1937

Charles J. Kiernan, A. E., B. S.

In Charge of Student Relations

Associate Engineer, Newark Technical School. Bachelor of Science, Rutgers University. Member of Faculty, of the Newark Technical School and the Newark College of Engineering since 1927.

To The Senior Class

Four years ago when the Class of 1937 came into being, the world was in the midst of a business and industrial catastrophe that was probably without parallel in all history.

Our well-being, happiness and perhaps our very existence were threatened by the failure of our economic system. We had, in 1933 and for several years before, seen banks close and shops and factories shut down, and industry in general in such a chaotic condition that there appeared to be no redemption. For several years we had witnessed the futile struggles of humanity to lift itself clear of the depression, in which we were merely individuals in a world apparently gone mad.

For most of us, the cause of this sad condition was not the most important consideration. We simply knew that the situation existed, and we wanted to do all in our power to get out of it. Most of us gave intense thought to the manner in which we could best accomplish this object, and I am constrained to believe that far many of you in the Class of 1937 the decision to come to Newark Technical School was the first definite step to overcome the disadvantages of the economic situation.

In your favor, of course, was youth with its never-failing courage. You had, in addition, an ambition born of adversity and it is of such that really great men are developed. About the same time most of you made your decision to enroll here, a ray of sunshine had finally penetrated the industrial gloom. In this way I believe you were favored. Certain definite signs indicated an upward trend in business shortly after you started your courses. During your second and third years here, this upward movement became decided, and during the present senior year there has been absolutely no question. We are again on our way!

So, you men of 1937, you are particularly fortunate that at a time when you are completing your work the demand for trained men, and particularly young trained men, is very great. I have no fear for your future. The past is behind you, while the days that are to come must be rosy and golden. Your success in the future is, in the main, based upon your own efforts. I have known all of you for the past four years. I don't believe I need say any more. Go on and conquer—the world is before you!

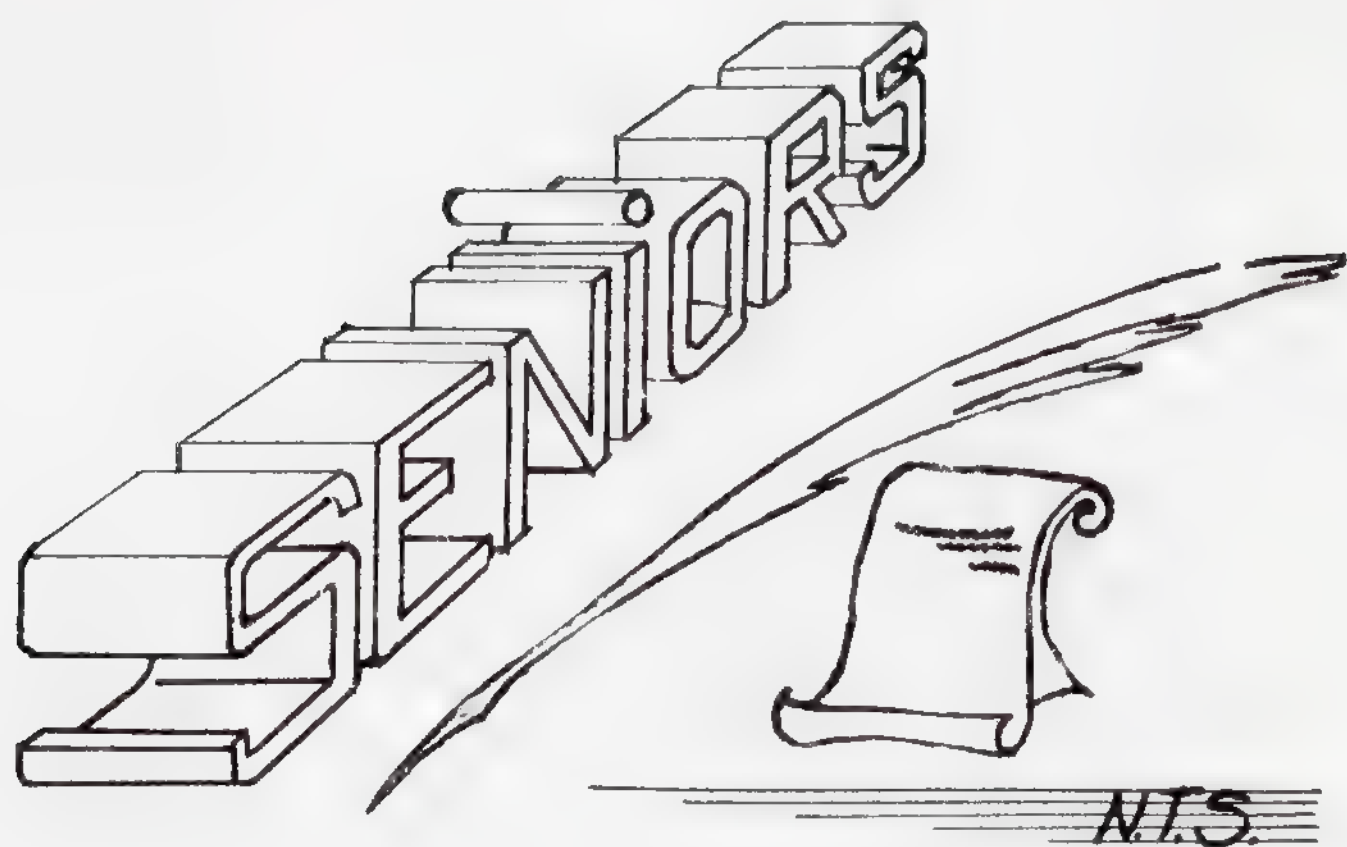

C. J. KIERNAN

Tempus Fugit

A few short hours, the year is gone
To rest with others, and anon
Is but a marker in the flight
Of Time, which knows not day or night
Yet measures off immutable
Destiny,—the inscrutable.

Man little recks the number of the year,
The countless hours before his advent here;
Nor can he guess the number that may be
Beyond the veil of all eternity.
Yet, still they pass too swiftly, till the child
Becomes a man, by age to be defiled
And then go back unto the earth again
His short life lived, Death trumpets its Amen!
Could we but total all he left behind
Would lasting good outweigh the futile mind?
Would all the effort of those countless years,
Replete with joy and sorrow and with tears,
Say that no time was wasted, that no deed
Was little worth the time, or that the need
That called for exercise of brain and brawn
Was but to Time the purpose of a Pawn?
Perhaps, and Yet the virtues of the past
Might far outshine the evils of the cast.
'Tis well to bear in mind that Time once spent
For good or evil was but to man lent,
And that it waits not on the will of him
Nor is it subject to his rule or whim.

President

O. FRANK PARACHINI—A.E.

371 Lincoln Avenue, Newark, New Jersey
Bakelite Corp., Bloomfield, New Jersey
CHEMICAL

President Class '37, Associate Editor Fratech 1934-1935, Editor 1936, Fratech Key 1935, Co-editor Year Book, Secretary N.T.S. Fraternity 1935-36, Summer House Committee, Chairman Publicity and Initiation Committees 1935-36 N.T.S.F., Forum Hour Director N.T.S.F., N.T.S.F. Photographer 1936, Junior Prom Committee, Usher at Graduation 1936, Usher 50th Anniversary Banquet of N.T.S.

A good man that perseveres, and in persevering succeeds.

O. Frank Parachini was born in New York City on June 27, 1915. In 1924 the Parachinis migrated to Newark and Frank entered the Newark school system at the Elliott Street School, continuing on through Central High into Newark Tech. With his entrance into Newark Tech the chemical engineering profession gained a new member.

Frank's work day is spent at the research laboratory of the Bakelite Corporation in Bloomfield where, as a laboratory assistant, he puts into practice the knowledge gained in the evenings at Tech.

Frank is to continue his studies at N. C. E. in the fall in the pursuit of a Chemical Engineering degree.

When not busy with school activities or lessons, Frank can usually be found in his photographic laboratory or on a tennis court.

We wonder what the "O" stands for.

Vice-President

HARRY O. KELLER—A.E.

48 Greene Terrace, Irvington, N. J.
I.J. Casey, Jr., Civil Engineer and Surveyor
CIVIL ENGINEERING

Pres. Swimming Club '35, Member Class Basketball '34-'35, Sports Editor Fratech '36, Associate Editor Fratech '37, Board of Managers Fratech '37, Board of Managers N.T.S. Fraternity '36-'37, N. T. S. F. Glee Club, N. T. S. F. Publicity Chairman and Reporter, Class Vice-Pres. '36-'37, Class Social Comm. '34-'35, Junior Prom Comm., Associate Editor of Year Book, Vice-Pres. Student Council '36, President Student Council '37.

Where there is a will there is a way

Harry O. Keller started his mundane existence in the City of Pforzheim, in southwestern Germany, on February 22, 1914. There he received his first seven years of grammar school education. He came to America at the age of 13, and made Irvington, N. J., his residence. He was graduated from Chancellor Avenue grade school and subsequently Irvington High School. Newark Tech was his next stepping stone in his quest for a B.S. degree. During his four-year stay he has done his level best to place '37 in the foreground at the expense of countless hours of sleep. Mention of hunting, fishing, swimming or skiing will always provoke extreme interest in Harry. It will be difficult to work at all those hobbies and enter N.C.E. in the fall, but where there is a will there is a way.

Treasurer

JOSEPH P. CARROLL—A.E.

1407 Shakespeare Avenue, New York
Manhattan State Hospital, New York
MECHANICAL

Class Treasurer 1936-'37 N.T.S.F. Board of
Managers; Junior Prom Committee; N.T.S.F.
Basketball (Champ) 1935-36.

**Honesty, Sincerity and Determination are
enviable attributes to success.**

No one warned us of a foreign invasion in 1933, but we suddenly awakened to find Joe Carroll, born and educated in New York, swinging along with the native sons. Well, in accordance with the "Good Neighbor Policy," we let him stay and soon found out that he "belonged." He has shown a fine spirit of cooperation and initiative and has been popular despite his Shylock qualities as Class Treasurer. His chief athletic interest while here has been the basketball team, on which he played when '37 captured the championship in 1936. After he has been graduated, he plans to enter the Newark College of Engineering. We wish him a proportionate return on the friendliness and hard work he has invested during his years here. The best of luck to you, Joe!

Secretary

RONALD FABER—A.E.

579 Yale Avenue, Hillside, New Jersey
Pulp Bleaching Corp., Orange, New Jersey
MECHANICAL

Newark Tech School Fraternity, Varsity Basketball '35, Class Basketball '33-'36; Secretary Class 1937.

**Success is well assured to a man who begins
where others leave off.**

The town of Lachine, Quebec, Canada, lays claim to his birthplace, this event having taken place March 20, 1915. At the age of some nine years a migratory urge struck the Faber family whence it found itself, to mention a few places, in Hamilton, Ontario; Toronto and East Stroudsburg, Pennsylvania. They are now securely established in Hillside, New Jersey. With a primary education received "on the run" the subject matriculated from Hillside High School in 1933. He now graduates from Newark Tech with an A.E. degree in Mechanical Engineering after two years in the Chemical Engineering course. After three years in the Technical Department of Driver-Harris, Ron has recently taken a position as assistant to the chemical engineer at Pulp Bleaching Corp., Orange. He expects to continue his studies in mechanical engineering at the Newark College of Engineering.

Sergeant of Arms

JOSEPH GAVIN—A.E.

127 Duncan Avenue, Jersey City, N. J.
The Port of New York Authority,
New York City
CIVIL

Sergeant-at-Arms '36 '37; Senior Dance Committee.

Give to the world the best you have and the best will come back to you.

Joseph Gavin started his existence in this world on May 18, 1911, twenty-six years ago. He was born in Jersey City, N. J., and has resided there all his life.

Both his elementary and secondary educations were received in Jersey City schools. He began his schooling in St. Aloysius Academy and four years later transferred to Public School No. 17. In 1926 he entered Lincoln High School and was graduated in 1930.

After graduation he entered the Evening Engineering Division of New York University to pursue a course in Aeronautical Engineering.

In 1931 he secured a position in the Engineering Department of the Port of New York Authority as a tracer. A year later he discontinued his studies at N. Y. U. as his interests had changed to Civil Engineering. Thus in 1933 he entered the Newark Technical School to secure the education necessary for the realization of this ambition. Since his matriculation at N. T. S. he has gone into the construction phase of engineering. He has gained experience in Line and Grade work and is at present engaged as inspector in the Midtown Hudson Tunnel.

Although it is impossible for him to enter Newark College of Engineering in the fall, he sincerely hopes that he will be able to do so in 1938.

Student Council Representative

THEO. "Ted" SCHNEIDER—A.E.

219 Boston Ave., Hillside, N. J.
Baker & Co. Inc., Newark, N. J.
MECHANICAL

Student Council; Class Officer '35-'36

Secretary N.T.S.F. '36-'37

Varsity Basketball 2 years;

Junior Prom Committee; Fratech Staff '35-'36

**A man of firm but friendly dignity
unhurried and considerate.**

It was on the fifth day of November in the year 1912 that Ted first saw the light of day. While he was still a little tyke the family migrated to Hillside where he received his elementary and secondary education; the latter being obtained at Hillside High School. Upon leaving school he obtained a position with the Arcturus Radio Corp. Being mechanically inclined, Ted did not stay at that position very long. He became connected with Baker & Co., Inc., of Newark where he completed a four-year apprentice course. It was during this period that he began studying at night school. With the completion of two years of mechanical drawing and blue print reading at South Side Evening School and a year of a special prep course at Newark Tech he entered the four-year Mechanical Engineering course of the Technical School. Now after five years of hard study he will take his place with the other alumni who live with pleasant memories of their undergraduate days.

Ted does not contemplate entering N. C. E. in the fall but hopes to complete some day, his course for an M.E. degree.

ORGANIZATIONS

Senior Class

O. Frank Parachini	President
Harry O. Keller	Vice-President
Joseph Carroll	Treasurer
Ronald Faber	Secretary
Joseph Gavin	Sergeant-at-Arms
Ted Schneider	Student Council

The first meeting held by the class of 1937 was on November 18, 1932. The officers elected were: President, H. Gee; Vice-president, H. Grady; Secretary, E. Murphy; Treasurer, G. Mulvahil. Mr. C. J. Kernan was requested to act as class adviser. Dues to cover the cost of a cut for the class in the Fratech and the drawing up of the class constitution were the highlights of that year's business.

The officers of the following year, 1933-34, were greatly aided in establishing the class as an active organization. The first social event of the class, a Stag Party, was held at the Bay View Wheelman's Club. The class disbanded for the summer vacation period after formally thanking President Gaudett, and Vice-president Headman, who was one of the best basketball players at the Tech that year; Treasurer Mulvahil, Secretary Morisen and Jim Grady, our "buxom" Sergeant-at-arms, for their untiring efforts toward the advancement of their classmates.

November of 1934 saw the class well on its way to a successful, educational, social, and athletic term with Mr. Frank Beldowski in the President's chair, Mr. E. Vail as Vice-president, Mr. Mulvahil as Treasurer, Mr. Dave Morisen as Secretary and Mr. James Grady, Sergeant-at-arms.

This was really a red letter year for the '37 class! The class basketball team soared off to fame by winning the intramural championship. Those scoring most points were Messrs. Sobol, Prulso, Faber, Schneider and Chaimovich.

A swimming club was formed in the School through the efforts of the class of '37, which supplied such outstanding members as Dave Morisen, Jack Bailin and Andy Buczek.

The next social event of our history was held on January 19, 1935, at a Stag Party given at the Bay View Wheelman's Club in Newark. Later a Dinner and Dance was held as Hosp's at Irvington, N. J.

Plans were made for a Junior year which would make history at Newark Tech.

When the class convened for its Junior year at Newark Tech, Mr. Frank Beldowski was once more chosen president, Mr. H. Keller, Vice-president; Mr. James Grady, Treasurer; Mr. Dave Morisen, Secretary, and Mr. Ted Schneider, Sergeant-at-arms.

When the class was asked to elect two members to the Student Council Ed. Beldowski and Harry Keller were chosen.

The Junior Prom—that date anticipated from the very inception of the class organization—was held on January 25, 1936, at the Elizabeth Town and Country Club. Bobby Meyers and his mad men of song and dance furnished the music, the ladies, with such a refined setting, supplied that latent urge to dance possessed by all good Techsters, and the boys from '37—well, we had a really delightful evening. Jim Grady, the chairman of this committee; H. Grady, J. Schechter, A. Buczek, Ted Schneider, H. Keller and J. Carroll were most certainly deserving of that traditional "rising vote of thanks."

Before retiring as Class President, Mr. Frank Beldowski called an election of officers for the Senior year. Mr. O. F. Parachini was elected President of the Senior class. Frank was aided in his administrative duties by Harry Keller, Vice-president; Mr. Ronald Faber, Secretary; Mr. J. Carroll, Treasurer, and Mr. Joe Gavin, Sergeant-at-arms.

Harry Keller and Ted Schneider represented the class as members of the Student Council. At the request of the Fratech for a class reporter Mr. Ed. McBride was appointed.

Late in November plans were under way for graduation. The Year Book Committee selected by Chairman O. F. Parachini consisted of Messrs. Chaimovich, Ciesla, Buonincontri, Dobushak, Dumont, Grady, Gushin, Keller, LaPenna, McBride, Moore, Morisen and Weber.

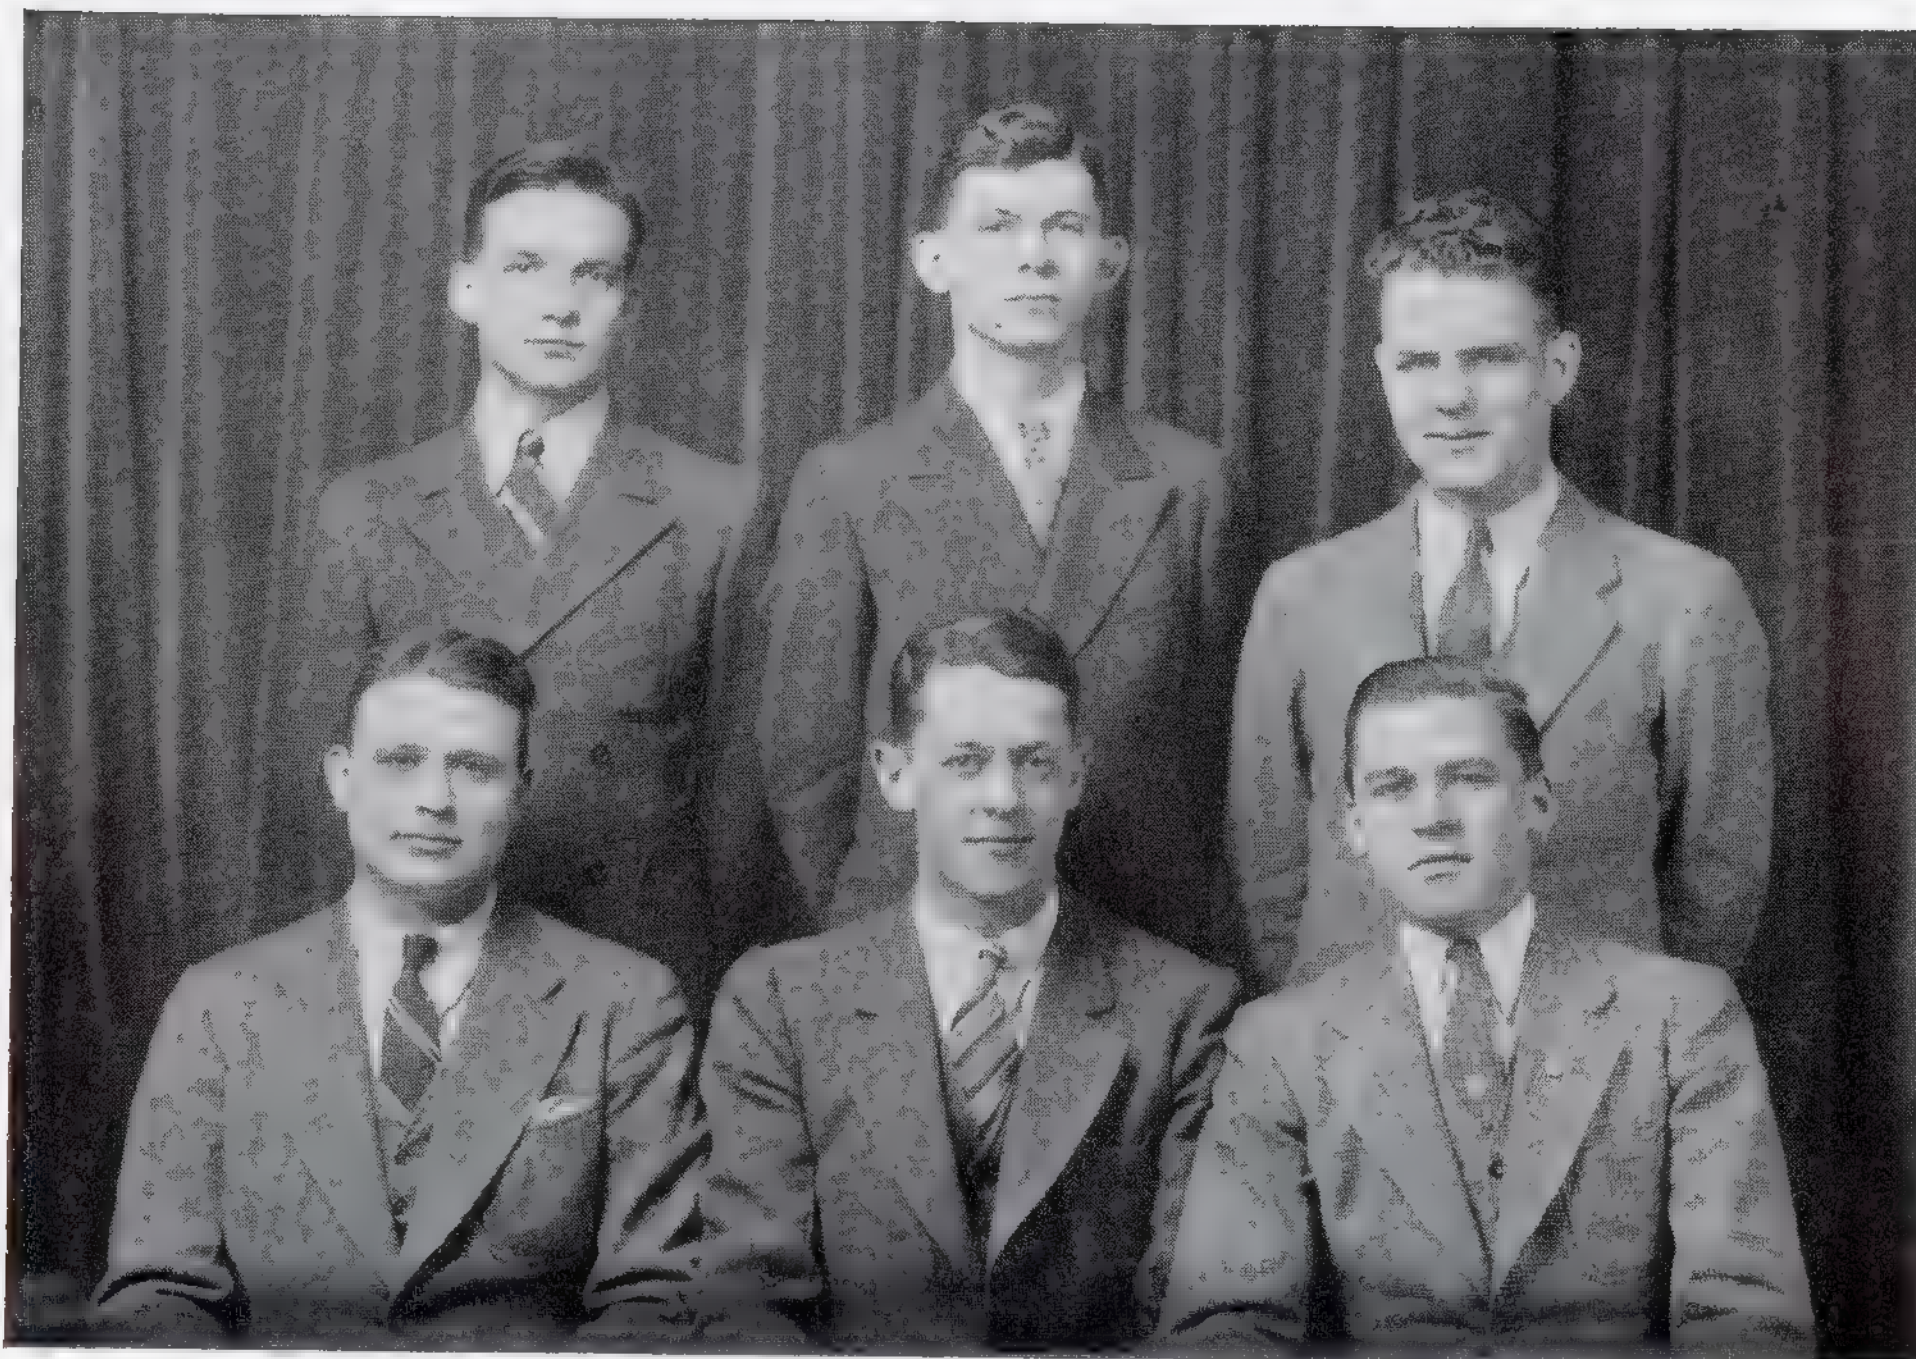

The following month the Key Committee, headed by Chairman Julius Weber and consisting of Messrs. Kelly and Tomaszewski, was formed.

At the Progress Club on April 3, 1937, the class members and their ladies enjoyed the Senior Ball. This affair was a rival to our Junior Prom, and it goes without saying that everyone had a good time. The committee responsible for this delightful party included R. Faber, chairman; J. Kelly, J. Gavin, A. Buczek and M. Krumholz.

Now we of '37 have finished our duties at Tech. We pass the torch to the class of '38 and say, "Labor Omni Vincit."

Vale!

E. T. McBRIDE

Junior Class

At last another year of learning has come to an end. Success has been with us and we hope we will never lose it. The members of our class have shown a greater interest in the organization for the past year. This increase in class interest has made our Junior Prom a great success. This function was a financial as well as a social success. There were at least forty couples present and they sure enjoyed themselves.

All this may be credited to the Messrs. Baker, Riceman, Van Leuben, Reichenstein and Brandt. These men have served our class and school faithfully and to the best of their ability. I sincerely hope that our Senior class officers serve our class as well as these men have served us in the past year.

The Junior class officers are planning another social affair that will be held some time during our spring term. The music will be supplied by Al Kurdek's Golden Crest Orchestra. We all hope that this affair will be as successful as our Junior Prom. There will be refreshments and entertainments at the next affair.

We are looking forward to a better year during our Senior term at the Newark Technical School, and may the following classes have the same thoughts and ideals that the classes of the past years had.

The Junior class takes this opportunity to congratulate the graduating class of '37, and may they be successful in all their future ventures.

A JUNIOR FAREWELL

A. G. BARTIROMO

Sophomore Class

J. DiRienzo	President
J. Bates	Vice-President
E. Sereda	Treasurer
E. Purcell	Secretary

This year has seen much activity in the class organization. Although a small number of members appeared at the meetings, they certainly supported the dinner-dance and caused it to be a huge success.

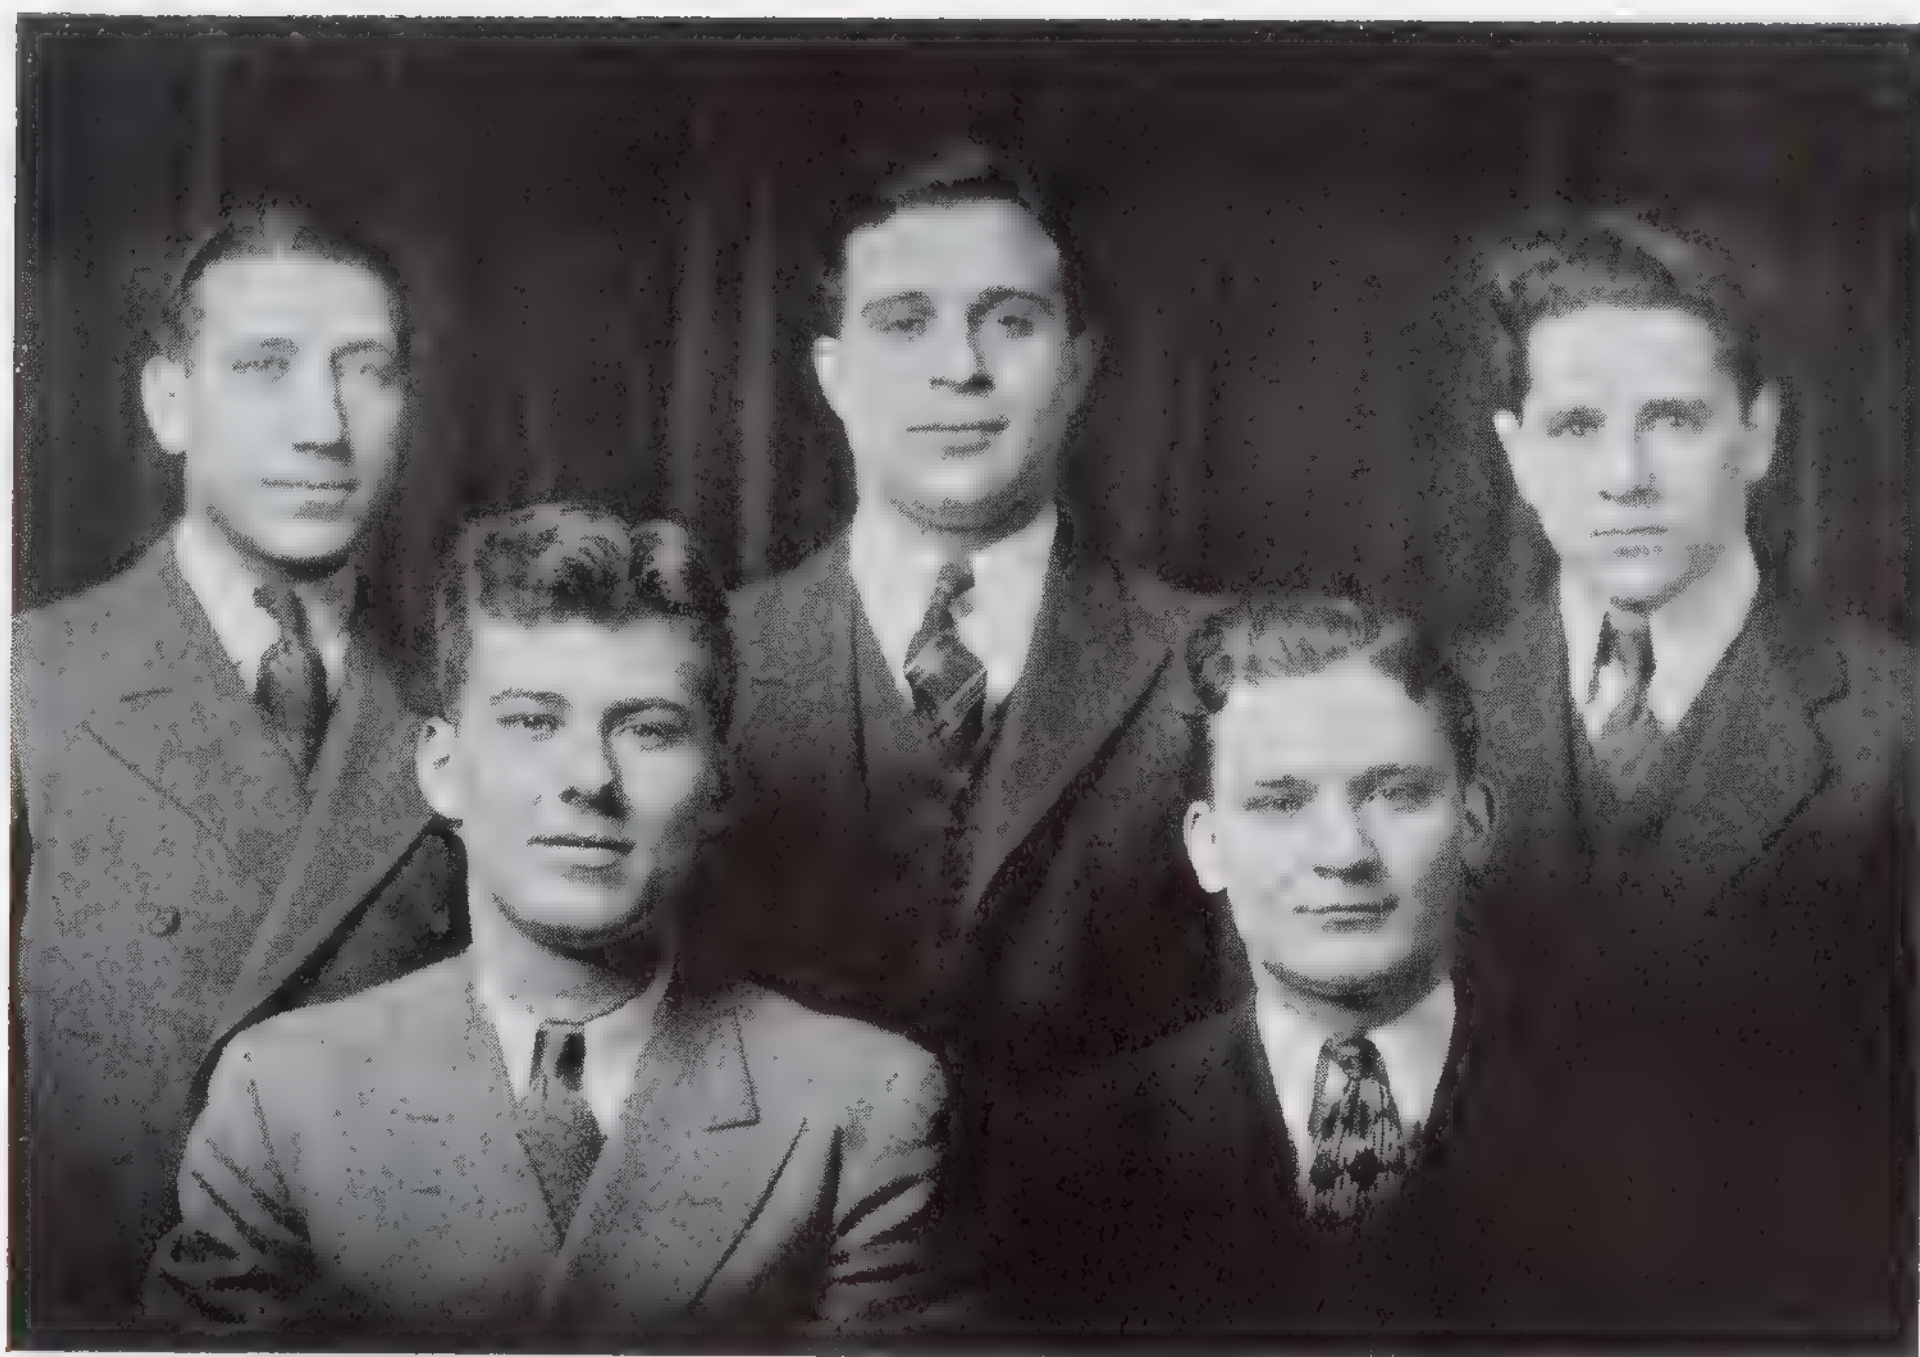

Mr. Nelson and Mr. Morrow were the appointees to the student Council.

The class of '39 was prominent in all sports and activities through the year. This was primarily due to the efforts of the officers. The activities class this year serve as an omen presaging conquest next year. The Class of '39 will be predominant in its Junior year. This is a challenge to all classes, clubs, and fraternities.

By supporting the class functions, the class, as a whole, has sanctioned the actions of the class officers and the small group which comprises the students who regularly attend the meetings.

In the term of 1937-38 a larger representation of the class is expected. Larger representation means better athletic teams, more social functions, and more well-organized committees. Larger representation will also tend to make my former statment more possible. Remember that the size of the class organization determines its formidability as a competitor in intra-mural operations.

Freshman Class

Class moto—"Don't give up the ship."

B. DiMurro	_____	President
J. Beno	_____	Vice-President
Wm. J. Halek	_____	Treasurer
Wm. Caruso	_____	Secretary

Last October we embarked upon our course at N.T.S. At the class meeting held for the election of officers we had a grand turnout. Today our class has the distinction of having had the largest turnout for a Freshman Class meeting in the history of the school.

We realize that an education in our profession is not the only reason for our enlisting aboard the N.T.S. We are all acquainted with the various organizations maintained for our benefit, and we intend to make full use of their facilities.

On February 6th, our apprentice seamen held a bowling party at the Bayview Wheelman Association. This party was attended by about thirty of our members and during the course of the evening we enjoyed ourselves immensely.

We can all be proud of our conduct and interest in this first year on the waters of Engineering. Next year we shall look back upon our term of apprenticeship and laugh at some of the serious storms and terrible water we have sailed through. We have been buffeted about by strong winds and have absorbed a lot of punishment, but we have safely maintained our equilibrium. Our first port of call is almost in sight and we can rest for a while before the next leg of our journey. Let us all resolve to become expert seamen and, "Don't give up the ship."

Wm. J. Halek

Student Council

Harry Keller _____ President
 Herman Reichenstein _____ Vice-President
 Benjamin Morrow _____ Secretary-Treasurer

Ted Schneider, '37
 George Nelson, '39

George Piehler, '38
 Isaac Strejevsky, '40

Charles Steinfeld, '40

Since its organization, the Student Council has become an increasingly essential part of the school activities. During the past year, it has endeavored to accomplish its purpose of contributing to the successful functioning of school life by fostering both the social and the educational needs of the students.

The fine cooperation of the school organizations with the Student Council, made possible, among other things, the success of the Convocation. This year's Convocation was declared to have been the best one ever held. Also, since the old school sticker did not seem to meet with the full approval of the student body, it was decided that a new one should be made and the Athletic Association was notified accordingly. The Athletic Association approved the plan and turned out the present sticker which seems to fulfill all the requirements of the students. Another achievement was the lessening of parking troubles of those students who drive in automobiles to school each night.

The Student Council feels that it has done much toward improving the school and it extends to its successors the earnest hope that they will be enabled to surpass the efforts of the Student Council of 1936-37.

The Fratech Staff

Edward Preusse	Editor-in-chief
Clifford Wolf	Business Manager
Charles Edgar	Advertising Manager

In its third year under a strictly student management, the Fratech, Newark Tech's official magazine, can be said to have progressed far towards the goal of an ideal school paper. Progress this year is best marked by the appearance of technical articles which we hope will prove to be an interesting feature next year.

The effect of the oddity type of write-ups evident in last year's issues was shown in the feature articles of this year's publications. Outstanding in this classification must necessarily be placed to J. Diliberto's "What Makes It Tick" and "Hello America." Also "Aircraft Engines," by Al. Bartiromo, and "You Figure It Out," by H. Keller.

To honor those of the staff who have done outstanding work, the Board of Managers yearly awards the much-coveted Fratech Key. Recipients of this gold key from members of the present staff include: Clifford Wolf, Business Manager and Charles Edgar, Advertising Manager.

For the first time this year the Board of Managers awarded a silver key to the following staff members: J. Diliberto, Associate Editor; A. Bartiromo, Class of '38; Charles Porter, Class of '39; Bernard Chaimovich, Athletic Association, and E. McBride, Class of '37.

Board of Managers

James P. Grady
Frank Beldowski

Edward Preusse

C. Wolf
H. Keller

Created as the managing board of the Fratech and having as its main duty the determination of policy, the board in its third year of existence as a purely student group has made considerable headway in the attainment of its aims. It is they who have set the price, organized its staff, and lastly, rewarded members with the Fratech Key. The board, composed of men of wide experience and of high calibre, have performed their task to the best of their ability, which includes a constant and determined effort to give the students a truly representative paper.

N. T. S. Fraternity

Arthur P. Mazzucchelli	President
Frederick Allendorf	Vice-President
Theodore Schneider	Recording Secretary
Louis Hamara	Financial Secretary
Gorden Mayfield	Treasurer
Jack Lipson	Master of Ceremonies
Morris Duncan	Sergeant-at-Arms
James Masterson	Custodian

BOARD OF MANAGERS

Graduate	Undergraduate
Ralph Rose	Joseph Carroll
William Hausmann	David Morison
	Harry Keller

The Fraternity extends its best wishes to the passing men of '37 who will with the close of this year enter the rank of Alumni. The Fraternity has counted its '37 brothers as the most active group of the past year. Some of their names will no doubt recall their leadership in past year's affairs. Brothers Schneider, Faber, Grady, Morison, Chaimovich, Beldowsky, Moore, Weber, Carroll, Buscek, McBride, Parachini, and Keller. It was their effort and work to a great extent, which helped the success of the Masquerade Dance, New Year's Eve Party, Theatre Party, Co-ed Swim, and Annual Dance, to mention a few of the affairs.

To them, as well as the rest of the brothers, the Fraternity has offered many an enjoyable as well as educational evening during their four years' stay in Newark Tech. Friendships of lasting qualities will no doubt survive the memories of the seasons which formed them. Truly the Fraternity did have a good time all of the time, and will strive even harder in the future to surpass the affairs of the bygone.

American Association of Engineers

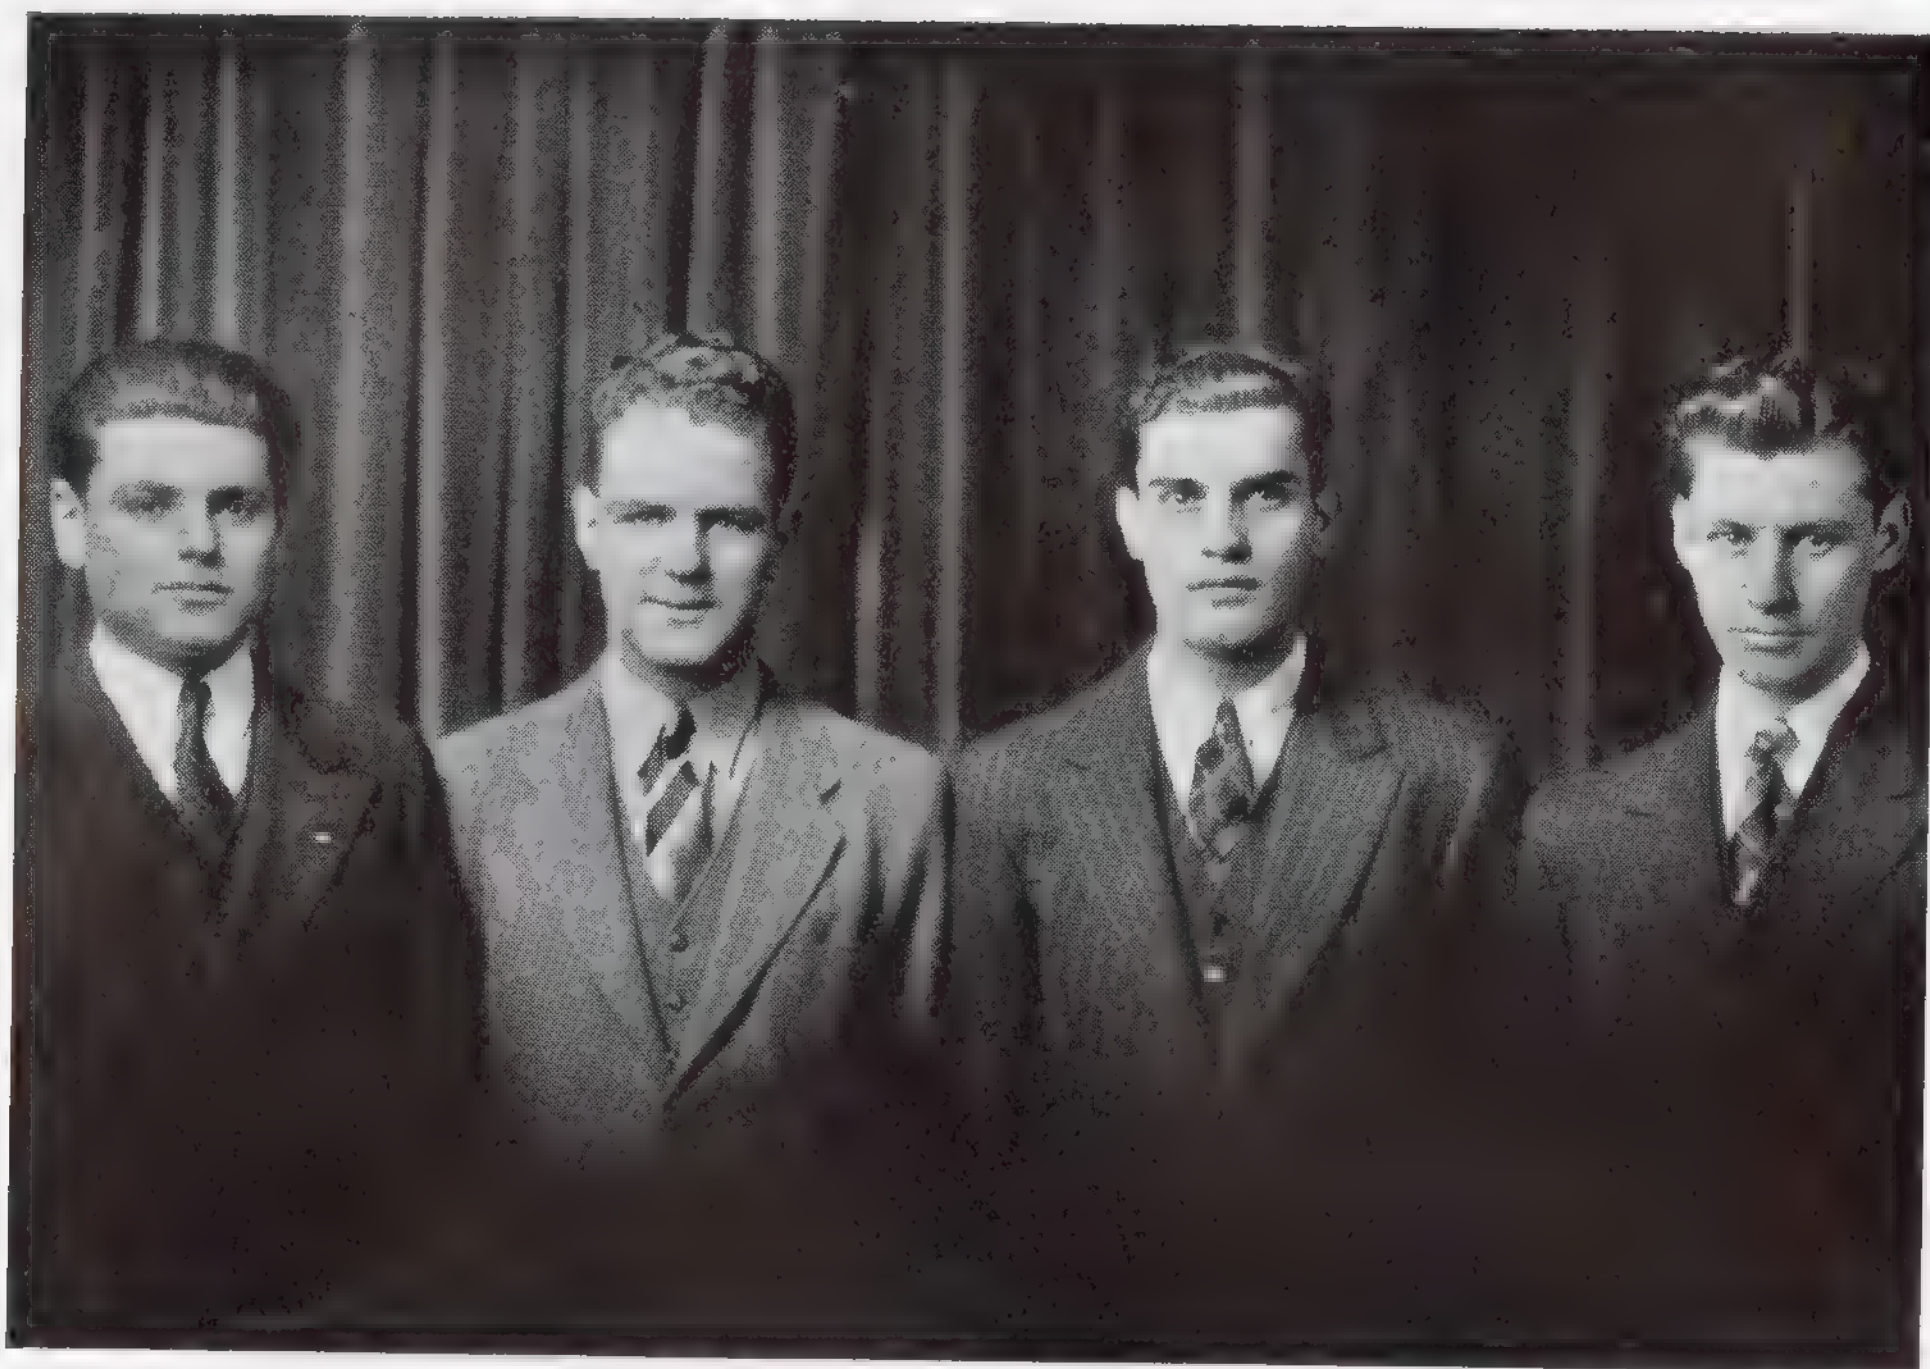

President	E. Preusse
Vice-President	R. Rubsamen
Secretary	V. Kearns
Treasurer	W. Schweyher

This society has for the past twenty-two years endeavored to form a nucleus about which the vast number of engineers may stand as a profession looked up to by the general public. Inasmuch as there are too many so-called engineers today, it is the objective of this organization to eliminate those who do not possess the requirements of an engineer.

These members of the Newark Technical School Student Chapter do not claim to be engineers, but do, however, strive to pave the way for the future so that when the day arrives they may take another step forward in the path of life where there will be waiting the merits for which they have worked during their student days. Although the members of this organization do not lay great stress on social activities, they do, however, find inspection trips of great importance as well as a recreation. During the past few years they have visited various points of interest some of which were: S. S. W. Virginia, Bremen and S. S. Leviathan, Feigenspan's Brewery, Bayway Refinery, Elizabeth Gas Company, Jersey Central Light and Power and Light Automatic Station at South Amboy, Newark Airport, Lehigh Coal Mines, Pennsylvania, Mercury Arc Rectifiers of the D. L. & W. R. R., Central Dial Office of the N. J. Bell Telephone Company, Underwriters' Laboratories, New York City, and Breyer's Ice Cream Plant.

And now in closing, these young men bid the Seniors farewell, wishing them success in all their future activities.
